

To whom it may concern,

LONGi Solar Technology, is a wholly owned subsidiary of LONGi Green Energy Technology, the world's largest manufacturer of monocrystalline silicon wafers, and is listed on the Shanghai Stock Exchange [SHA: 601012]. LONGi was founded in the year 2000 and began manufacturing and selling PV Modules in addition to its wafer business in 2014.

To date, LONGi has manufactured and sold over 20 GW of PV Modules globally and has delivered more than 1 GW of PV Modules to the US. As a pioneer in solar photovoltaic research and development and global manufacturing, LONGi is a leader in all health and safety regulations in every market where we operate, including regulations from the Environmental Protection Agency (EPA) and the European Environmental Agency (EEA). Our manufacturing facilities certified to OHSAS and ISO standards, and are routinely audited by a host of industry leading Independent Engineers, QA/QC firms, and standards regulatory bodies to ensure that only the highest products leave our facilities.

Our products are backed by the strongest warranties in our industry and are guaranteed to perform as intended over their useful life. All of our products have undergone testing and certification for compliance with applicable environmental, health, and safety regulations. LONGi stands behind our products and have no knowledge of any groundwater or other pollution issues resulting from the use of our panels at any commercial site.

Additional product documentation and copies of applicable certificates can be provided upon request.

Best regards,
